Message from the Director

Industry Training & Continuing Education (ITCE) at Olds College of Agriculture & Technology is operated by a passionate and dedicated group of professionals committed to supporting you through your lifelong learning journey as you look to upskill in your current profession or reskill for that next role.

We offer a variety of industry-aligned courses and programs across various sectors from Agriculture and Animal Science to Horticulture and Heavy Equipment Operator Training. We also have courses in Business, Trades and the Service Industry. We really have something for everyone!

In addition, if you're looking for customized industry training for your organization, school district, First Nation or industry association, please contact us, so we can explore your needs and collaborate on a solution that will help take your organization to the next level.

Our top-notch instructors, first-class facilities and long-standing industry relationships allow us to deliver the highest quality programming with a strong focus on practical, hands-on training. In addition to in-person training on and off campus, we also offer online courses, where you can learn at your own pace in the comfort of your home or office. We strive to offer flexible delivery modalities to allow for the many different schedules and life situations out there.

In the end, we're here to provide quality programming that will benefit you in your career.

Best Wishes,

Chris Wharton
Director, Olds College Industry Training & Continuing Education

AGRICULTURE

Grow Your Future in Agriculture

Agribusiness Finance Certificate

ONLINE | FOUR COURSES + ONE ELECTIVE | EIGHT WEEKS PER COURSE

Elevate your rural enterprise with this flexible online program designed for rural business owners and agricultural lenders in both conventional and non-conventional agriculture. Master management and financial assessment skills through four core courses and one elective – these can be taken together to earn your certificate or as stand-alones.

No prerequisites. No previous college education required.

Agriculture Sales & Customer Support Certificate

ONLINE | FOUR COURSES + SIX-MONTH INTERNSHIP | 10 MONTHS

Meet the rising demand for innovation in Canada's fastest-growing industry with the Agriculture Sales & Customer Support certificate. Developed alongside industry leaders, this program combines technical expertise with on-the-job training – including a six-month internship that can be completed with your current employer – to ensure you are career-ready. Individual courses may be taken as stand-alones.

No prerequisites. Must be 16 years of age or older. Requires an Alberta High School Diploma or equivalent, or qualifies as a mature student

Agronomy Certificates

Ideal for those new to agronomy, professionals seeking to upskill or individuals with international agricultural experience. This two-level certificate pathway is designed to meet the agri-service industry's demand for skilled crop scouting and agronomy professionals. Delivered primarily online, these certificates provide practical, career-focused training grounded in Western Canadian farming practices.

Level I Certificate

ONLINE | FIVE COURSES + FIVE-DAY FIELD SCHOOL | EIGHT WEEKS PER COURSE

This entry-level program introduces learners to core agronomy concepts. Students gain hands-on experience in crop production systems, soils and nutrition, pest management, weed fundamentals and field data collection.

Level II Certificate

ONLINE | FIVE COURSES | 10 WEEKS PER COURSE

Building on Level I, this program deepens expertise in integrated pest management, soil and fertility management, crop planning, diagnostics and production technologies. Learners develop the ability to integrate agronomic concepts and make informed crop production recommendations.

Prerequisite: Agronomy Level I Certificate

AGRICULTURE

Grow Your Future in Agriculture

Indoor Agriculture Certificate

ONLINE | FIVE COURSES | EIGHT WEEKS PER COURSE

Experience Controlled Environment Agriculture (CEA) with our innovative online program. Master the future of sustainable farming by blending plant science with cutting-edge indoor technology and savvy business practices. This program is your high-tech pathway to a rewarding career in Canada's booming vertical farming and hydroponics sectors.

Visit our website for more information on admission requirements.

SHORT COURSES

Agriculture Technology Equipment Operator

ONLINE | 10 HOURS TO COMPLETE IN TWO MONTHS

Explore the mechanics and high-tech precision of modern agriculture through an online deep dive into machinery operations, safety protocols and the digital control systems optimizing today's fields.

Awareness of Agricultural Technology in IP Commercialization

ONLINE | FIVE MODULES TO COMPLETE IN TWO MONTHS

Unlock the strategic potential of your agricultural innovations by mastering the art of protecting, commercializing and enforcing intellectual property (IP) in today's high-tech farming landscape. Perfect for innovators, entrepreneurs or professionals in the agricultural sector.

Certified Crop Advisor Tutorial

ON CAMPUS | FOUR DAYS | 8 A.M. - 5 P.M. DAILY

Our experienced instructors will help you prepare for the Certified Crop Adviser (CCA) Prairie Provinces and International exams through this intensive, four-day tutorial training session. Prepare to write your exams with confidence.

Introduction to Agriculture

ONLINE | 10 HOURS TO COMPLETE IN TWO MONTHS

Discover the vibrant heartbeat of Canadian agriculture through a comprehensive exploration of Canada's diverse livestock and crop sectors, from traditional field practices to global market trends. Perfect for those transitioning to the Canadian agricultural landscape.

Vertical Farming Technologies

ONLINE | EIGHT HOURS TO COMPLETE IN ONE MONTH

Step into the future of food production by mastering the essentials of vertical farming, from climate-controlled cultivation techniques to the data-driven technologies used in commercial and home-based indoor systems.

ANIMAL SCIENCE

Animal Science for Modern Agricultural Markets

Beef Production Certificate

ONLINE | FIVE COURSES | EIGHT WEEKS PER COURSE

Delve into the world of beef production with our dynamic online certificate program, designed for both aspiring and employed individuals in the livestock sector. Each course stands alone to bolster your skills or can be combined to earn your comprehensive beef production certificate. Ideal for farm staff, agricultural writers, farm managers, cattle managers and calf rearing staff, this program covers essential topics including production systems, handling, nutrition, health and more.

No prerequisites. No previous college education required.

Cattle Artificial Insemination (AI)

ON CAMPUS | FOUR DAYS

Join our intensive four-day course covering all aspects of reproduction management, utilizing classroom lectures and hands-on sessions you will gain expertise in controlled breeding, semen handling and sire selection, while learning from industry experts and acquiring the knowledge and skills needed to confidently kickstart AI practices at home. This course includes a review of how nutrition impacts reproduction, as well as tools for setting up an AI strategy within your own herd.

No prerequisites. No previous college education required.

Veterinary Practice Management Certificate

ONLINE | SIX COURSES | 10 WEEKS PER COURSE

Flexible and interactive, our online certificate program offers coursework designed for immediate implementation in your veterinary clinic. Led by experienced instructors, each course provides coaching, feedback and opportunities for collaboration through online forums. Ideal for veterinary professionals seeking to enhance business practices, with the flexibility to take courses individually and complete the certificate at your own pace within five years.

No prerequisites, although a minimum one year experience working in a veterinary setting is strongly encouraged.

ANIMAL SCIENCE

Animal Science for Modern Agricultural Markets

RVT CONTINUING PROFESSIONAL DEVELOPMENT HOURS

Canine Conditioning Refresher

ONLINE | 12 HOURS

This online instructor-less course is designed to assist animal health technologists and veterinary technicians grow their knowledge of canine conditioning and its benefits.

Introduction to Small Animal Dentistry Refresher

ONLINE | 4 HOURS

This online course is for individuals who are interested in gaining further confidence in the area of small animal dentistry, with a focus on COHATs, oral anatomy and dental instruments used in small animal dentistry.

Hands-Free Radiology Techniques Refresher

ONLINE | 3 HOURS

In this online asynchronous course, you will gain further knowledge in the aims and goals of hands-free radiology, the benefits of it, implementation and different hands-free techniques to ensure quality diagnostic x-rays.

Small Animal Anesthesia Refresher

ONLINE | 9 HOURS

Small Animal Emergency Medicine Refresher

ONLINE | 11 HOURS

This online instructor-less course is designed to assist animal health technologists and veterinary technicians refresh their knowledge of small animal emergency veterinary medicine.

COURSES & WORKSHOPS

Animal Body Condition Scoring

BLENDED DELIVERY | ONE WEEK ONLINE, ONE DAY IN LAB

This course provides learners with the necessary knowledge and skills to perform body condition scoring (BCS) and animal behaviour assessment for a variety of select animal species.

Bovine Ultrasound for RVTs

ON-CAMPUS | TWO DAYS

Ultrasound is an extremely accurate tool for evaluating pregnancy and the reproductive tract of cattle! Did you know that using an ultrasound for beef cattle can help improve efficiency, increase safety, and reduce strain on your body?

Basics of Canine Massage

ON-CAMPUS | TWO DAYS

This entry level introductory course utilizes both theory-based knowledge training and hands-on massage for your canine partner.

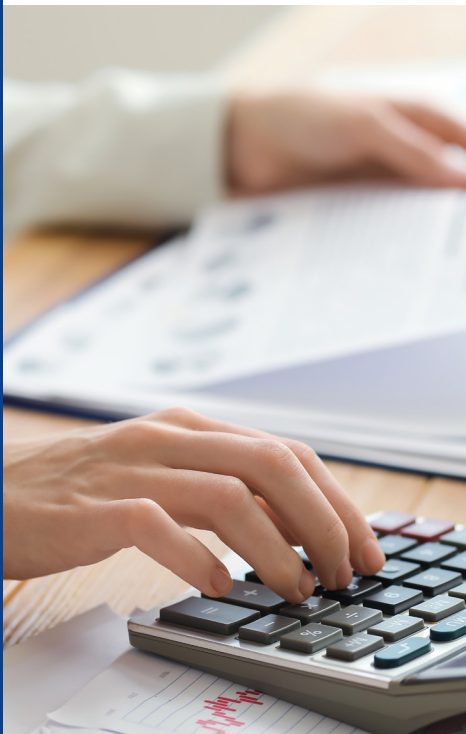

Level 1 Beekeeping

BLENDED DELIVERY | 50 HOURS

Apply your knowledge of bee biology and health, pollen and nectar, hive placement, feeding plans, and strategies for colony management. With the knowledge gained in this course, you will be able to develop solutions to overcome a variety of common beekeeping challenges.

Business for a Changing World

Administrative Assistant Certificate

ONLINE | FIVE COURSES | EIGHT WEEKS PER COURSE

This certificate equips you with versatile skills essential for office environments. An online program which offers flexibility, allowing you to study at your convenience. You can take each of the five courses individually to enhance your skill set, or complete them all for the full certificate. Courses cover topics including Bookkeeping, Computer Applications, Office Procedures, Workplace Communications and Workplace Professionalism.

No prerequisites. No previous college education required.

General Business & Computer Courses

ONLINE | SIX WEEKS PER COURSE

Delivered through Ed2Go, these flexible, entirely online courses feature monthly sessions in a six-week format, covering Accounting, Business and Computer subjects. With expert instructors and an interactive learning environment, you'll find a diverse selection of courses in Windows, Microsoft, Adobe, Project Management, Human Resources, Leadership, Writing, Social Media, Marketing and more.

No prerequisites. No previous college education required.

Leadership Training

ONLINE | FLEXIBLE SESSIONS

We are excited to offer an extensive series of Leadership Workshops designed to cater to diverse organizational needs. Our Leadership Workshops are designed not just to educate but to transform. They equip your team with the necessary skills to foster a positive work environment, enhance interpersonal relationships and drive successful outcomes. Engaging in these workshops can help your team navigate complexities with resilience and build a culture of trust and inclusivity, essential for sustained organizational growth.

No prerequisites. No previous college education required.

Custom Training for Industry Success

Tailored Training Solutions

Unlock the full potential of your team with customized training solutions from Olds College. With our extensive experience spanning over a century, we understand that every organization has unique goals and challenges. Let us work closely with you to design and deliver training programs that address your specific needs, ensuring maximum impact and success. We also work with certifying bodies to deliver third-party training directly to industry.

Our Process

We follow a comprehensive process to ensure the success of your customized corporate training. Our team begins with a thorough needs assessment, gaining insight into your organization's requirements. From there, we design a tailored curriculum and delivery plan, leveraging various methods such as instructor-led classes, online learning and blended approaches. Throughout the training, we continuously evaluate effectiveness to guarantee desired outcomes are achieved.

Benefits & Funding Opportunities

Investing in customized corporate training can yield significant benefits for your organization. By enhancing employee skills, knowledge, productivity and workplace safety, you're positioning your team for long-term success.

EQUINE

Equine for Performance & Care

COURSES & WORKSHOPS

Basic Equine First Aid

ON-CAMPUS | ONE DAY

A one-day hands-on course with horses covering: what your vet needs to know when you call, conditioning a horse to accept treatment, taking proper vital signs, dealing with lacerations, punctures, colic, choke, collapse, casting, shock, hoof issues, recognizing pain in the horse, sources of pain and alleviation, spinal health, injury prevention and so much more!

No prerequisites. Open to ages 10+.

Advanced Equine First Aid

ON-CAMPUS | ONE DAY

Covering everything from assessing the condition of a horse, trapped horses, poison, burns, bites, hypo/hyperthermia, tie-ups, fractures, sucking chest wounds and more, this course prepares the student to handle the most serious injuries, where without human intervention the horse will not survive.

Prerequisite: Basic Equine First Aid

HORTICULTURE

Horticulture for Industry & Innovation

Prairie Horticulture Certificate

ONLINE | NINE COURSES + ONE ELECTIVE

Designed for the unique landscapes of the prairie provinces, this program offers four distinct streams tailored to your interests: fruit and vegetable production, landscaping and arboriculture, greenhouse crop production and nursery crop production. With flexible scheduling and expert guidance, you'll unlock the full potential of prairie horticulture and emerge with a valuable credential to advance your career.

No prerequisites. No previous college education required.

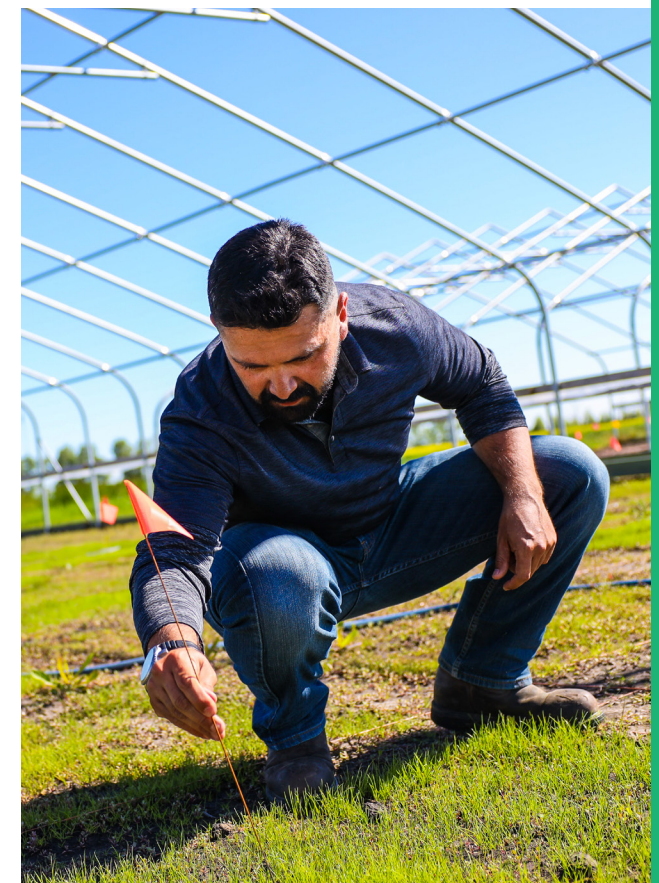

Turf Science Certificate

ONLINE | TWO COURSES + ONE ELECTIVE | TEN WEEKS PER COURSE

Designed for both newcomers and seasoned professionals, these online courses cover the science, cultural systems and construction practices vital for success in the turf industry. From foundational knowledge to specialized expertise, you'll explore topics ranging from turfgrass biology and soil properties to cultural practices and pest management.

This program offers accessible and practical learning opportunities tailored to your professional goals. Whether you're interested in parks, sports turf or golf courses, this program equips you with the skills and knowledge needed to thrive in this dynamic field.

No prerequisites. No previous college education required.

Land & Environment for Responsible Resource Management

Surface Land Management

ONLINE | SEVEN COURSES + TWO ELECTIVES | TEN WEEKS PER COURSE

The Surface Land Management courses will equip learners with essential knowledge and skills, preparing them to navigate the complexities of land management in Canada, particularly within Alberta. Students will develop knowledge of foundational principles, regulatory processes and stakeholder engagement.

While students can start with any of the scheduled courses, it is suggested that individuals who are new to Surface Land Management start with SLM 7001 Fundamentals of Surface Land Management. Experienced Land Agents can start with any available course.

COURSES & WORKSHOPS

Reclamation Workshops

Reclamation transforms industrial sites, like those in mining or oil and gas, back to their natural states. Olds College offers courses that teach these fundamental practices, focusing on reducing environmental impacts to promote sustainable industry operations.

Introduction to Geographic Information Systems

Olds College provides introductory customized training in QGIS and ArcGIS Pro. This provides companies an opportunity to train employees with their own data points. These programs are widely used in Agriculture, Environmental Services, Construction Companies, Engineering Firms and Municipal Planning Departments.

Lawn & Garden Pesticide Dispenser

INDIVIDUAL HOME STUDY OR CUSTOM GROUP TUTORIAL UPON REQUEST

All provincial sales outlets carrying regulated Domestic Class Lawn and Garden Pesticides must employ a certified Lawn and Garden Pesticide Dispenser to ensure that consumers have access to correct information regarding pest control, pesticide regulations and safety requirements. Certification requires completing an exam within one year of registration, and is valid for five years. There are two ways to get your certification:

- Home study program
- Corporate online live lecture tutorial

It is strongly recommended that you study and complete the self checks in the Lawn and Garden Pesticide Dispenser Manual prior to attending a corporate onsite tutorial.

Pesticide Applicator Tutorials

ON-CAMPUS

Tutorials:

Industry experts will help you prepare for your Agriculture, Industrial and Landscape exams in-class and with hands-on sessions! We have several tutorial sessions options available:

- Authorized Assistant (Core Only) 1 Day
- Agricultural, Landscape & Industrial Designations (No Core) 3 Days
- Agricultural, Landscape & Industrial Designation (Includes Core) 4 Days

Pesticide Applicator Recertification

ON-CAMPUS | TWO DAYS

Recertification:

We offer four different workshops with up to 10 Alberta Environment Approved CEUs that will keep you up-to-date with the newest ideas and technology as well as build your professional network. There are a variety of concepts offered for CEUs.

Workshops will include approved Alberta Environment CEU concept areas for training: Application Technology, Emergency Response, Environment, General Information, Human Health, Labelling, Pesticide Safety, Pest Management, Professionalism and Regulations.

SERVICE INDUSTRY

Service Industry for Hospitality & Animal Welfare

AHLA Hospitality Training

ONLINE | TWO COURSES

The Alberta Hotel & Lodging Association (AHLA) Hospitality Training Course offers comprehensive video-based learning designed for both newcomers and seasoned professionals in the hotel sector. Delve into over 100 tailored video assets crafted by industry leaders, providing invaluable insights and practical knowledge essential for success in hospitality. Whether you're exploring the basics of hotel operations or aiming for leadership roles, our courses empower you to elevate your career with confidence and expertise.

No prerequisites. No previous college education required.

Animal Welfare & Humane Slaughter

ONLINE | SIX COURSES | THREE MONTHS PER COURSE

Embark on a comprehensive journey into humane slaughter practices with our online program, tailored for professionals in Canada's meat processing industry. Designed to meet the evolving needs of both newcomers and seasoned veterans, this program offers a cohesive overview of theory and applications relevant to the slaughter of various species. Broken into six individual courses covering animal welfare, bleeding, stunning, handling, barn environment assessment and poultry slaughter, you can review each course at your own pace over a three-month span, conveniently fitting into your professional schedule.

No prerequisites. No previous college education required.

COURSES

Cider Beverage

ONLINE | FIVE MODULES | TWO MONTHS TO COMPLETE

The Cider Beverage course will give the student a background in Cider-making that will provide them with the skills and background necessary for a career in the cider industry. Production, flavors, quality, finishing and marking and sales are explored.

No prerequisites. No previous college education required.

General Beverage

ONLINE | FIVE MODULES | TWO MONTHS TO COMPLETE

The General Beverage course will familiarize you with the sensory attributes of different beverages and how they are produced and packaged. Production, quality control and introduction to sensory attributes, filtering and packaging are explored. In each module, you will learn with interactive lessons which are followed by a self-knowledge check.

No prerequisites. No previous college education required.

Home Game Butchering

OFF-CAMPUS | SIX HOURS

A great beginner course for anyone looking to cut and process their own game. Learn proper and efficient techniques that may be easily done from home. These skills will help you get the most out of your carcass. You will have the opportunity to take home the meat you are working on.

No prerequisites. No previous college education required.

Home Sausage Making

OFF-CAMPUS | SIX HOURS

A great beginner course designed to take the guesswork out of the grind and give you the skills to create the perfect sausage every time.

From the initial meat selection to the final click of the smokehouse door, you'll dive deep into the science of sausage production. Learn the fundamentals of meatblock selection, grinding and stuffing techniques and the art of mixing spices for bold, balanced flavour.

You will be making 3-5 sausage recipes. Two of the batches will be cooked and served for lunch, the others are yours to take home.

Pasture to Plate Direct Marketing

ONLINE | SIX WEEKS

Pasture to Plate - Livestock Direct Marketing is a one of a kind short course. Participants will gain skills over a six-week time frame that will help them to better understand livestock agro-food systems, niche product marketing, and how they can apply direct marketing skills to their own operations.

No prerequisites. No previous college education required.

Trades & Industry for Workforce Readiness

Heavy Equipment Operator Certificate

ON-CAMPUS | 12 WEEKS

Our immersive Alberta Advanced Education approved curriculum blends online instruction with hands-on training in a simulated work environment, providing industry-relevant project experience. Led by experienced instructors, you'll master a variety of equipment, including skid steers, loaders, dozers, graders, excavators and rubber tire backhoe. Upon completion, you'll be equipped with the skills needed for employment in various industries, supported by our industry-developed curriculum and mandatory practicum.

If you're already an experienced operator, contact us for Advanced HEO Safety Certification options!

No prerequisites. No previous college education required.

Individual Equipment Training

ON-CAMPUS | ONE WEEK SAFETY TRAINING + 25 - 75 HOURS OF TRAINING

Olds College offers specialized training for novice operators across key equipment: skid steer, dozer, loader, rubber tired backhoe, grader and excavator. Each course runs for two to four weeks with up to 75 hours of hands-on equipment time. Training includes First Aid, CPR, H2S Alive and more, focusing on safety regulations, preventative maintenance and basic operational techniques. Courses aim to equip operators with necessary skills and industry-standard competencies. For more details and customization options, please contact Olds College.

No prerequisites. No previous college education required. Minimum 18 years of age. Grade 10 reading and math and English language proficiency.

Apprenticeship & Industry Training (AIT) Entrance Exam

ONLINE | THREE MONTHS

The Pre-Apprenticeship Exam Training program consists of four individual courses to prepare participants of the trades industry for success in their continued employment, education and mandatory qualifications exams.

Courses are self-directed & interactive.

Students who wish to register to become an apprentice and learn on the job, without the prerequisite high school education, must write an entrance exam based on Math, Science, and English Skills.

Each trade requires a variety of different requirements (for example some require Math similar to 20-3, some recommend higher levels), but each of these courses has no prerequisites.

Air Brake Endorsement

ON-CAMPUS | 14.5 HOURS

If you're looking to complete the requirements to achieve the Alberta Transportation "Q" Endorsement, then look no further. After successful completion of the practical exam, and the written exam which must be taken at the Registry, you will be eligible to apply for the "Q" endorsement through a Registry agent.

No prerequisites. No previous college education required.

Small Engines

ON-CAMPUS | 21 HOURS

Learn theory and techniques to diagnose and repair small engines such as motorcycles, lawnmowers, garden tractors, snowmobiles and other small engines.

Explore two areas of focus:

- Small Engines - Tune Up & Regular Maintenance

For those with little to no experience with engines. This course will cover the theory and techniques to diagnose and then hands-on time in the lab on small engines such as lawnmowers, garden tractors, motorcycles and snowmobiles. You will come away with a better understanding of how to diagnose electrical, fuel and mechanical problems and get the engine tuned up.

- Small Engines - Overhaul Procedures

For those that have either completed the Tune and Regular maintenance course or someone that has a good deal of experience in regular maintenance of small engines and wants to learn how to overhaul an engine. This course will go into depth regarding the overhaul of engine systems, drive trains and electrical systems.

No prerequisites. No previous college education required.

TRADES & INDUSTRY

Trades & Industry for Workforce Readiness

Introduction to Welding

ON-CAMPUS | 30 HOURS

Designed for beginners and for welders who would like more hands-on practice. This course will cover the theory, techniques and shop practice of oxyacetylene welding of mild steel brazing, flame cutting, arc welding and MIG welding.

Ages 14 & 15 must enroll along with a parent/adult. Age 16+ can enroll without a parent. This includes a student who will be turning 16 during the course dates.

Powder Coating

ONLINE | THREE MONTHS ACCESS
OR AT YOUR LOCATION | 21 HOURS TRAINING

Embark on the opportunity to learn about the essential aspects of powder coating, including the benefits and costs of powder selection, safety precautions, surface preparation, substrates, hanging systems, booth design, powder application, curing processes and quality control.

Customized on-site consulting and training to increase efficiency and skills for powder coating businesses is available.

No prerequisites. No previous college education required.

Home Inspection Certificate

ONLINE | 10 COURSES | 12 WEEKS

This 10-course program builds the technical skills and expertise to conduct visual exams of residential properties and produce professional reports on their condition. You will develop practical communication skills, professional conduct and knowledge of industry standards.

No prerequisites. No previous college education required.

Summer Youth Programs

Introduction to Veterinary Medicine for Teens

Explore careers in animal care with hands-on learning and real-world experience. Through interactive lessons, demonstrations and hands-on experiences, you'll explore essential skills and discover a variety of career options in veterinary science. If you're aged 13 to 16 and considering a career in this industry, this camp will introduce you to animal care basics and first aid.

Exploring Veterinary Medicine: Large Animals

Ever dream of working with horses and cattle? Want a sneak peek into the life of a veterinarian who works with large animals? This intensive four-day program is your chance to dive in, get hands-on and see what it's really like to care for large animals.

Future Mechanics: Small Engines, Big Skills

Whether you've never touched a wrench or you're already tinkering in the garage, you will learn theory and then go straight to hands-on lab work. By the end of the week, you'll know how to keep small engines running and how to rebuild one.

Green CERTIFICATE
